RepSM Plus Model Import Connector Release Notes

The Micro Focus Security ArcSight Reputation Security Monitor Plus (RepSM Plus) solution uses internet reputation data to provide an updated list of known bad or harmful domains of IP addresses to provide context to security events. The Model Import Connector for RepSM Plus is a component of RepSM Plus which retrieves reputation data from the RepSM Plus threat intelligence service, processes this data, and forwards it to ArcSight ESM.

The threat intelligence includes reputation information about internet nodes which are known to exhibit bad behavior. The ill reputed nodes are identified by their network address or Domain Name System (DNS) name. This data is used by the accompanying RepSM Plus content package to detect malware infected machines, zero day attacks, and dangerous browsing. The user can also use the data to implement custom ESM solutions. For further details on this solution, see the Micro Focus Reputation Security Monitor Solution Guide.

What's New

- Certified on RHEL 8.1, 64-bit.

Certified Platforms

- CentOS/RHEL Linux 7.8 and 8.1

Supported Platforms

- CentOS/RHEL Linux 6.10
- CentOS/RHEL Linux 7.7

Release Contents

The files related to the Model Import Connector in the RepSM Plus release are:

File Name	Description
RepSMPlusModelImportConn_RelNotes_8.1.0.8395.0.pdf	Release notes (this document)
RepSMPlusModelImportConn_ConfigGuide_8.1.0.8395.0.pdf	Configuration guide
ArcSight-8.1.0.8395.0-RepSMModelConnector- Linux64.bin	Installer for Linux 64-bit systems
ArcSight-8.1.0.8395.0-RepSMModelConnector- Win64.exe	Installer for Windows 64-bit systems
Micro_Focus_RepSM_Plus_1.70.0_Customer_Letter.pdf	What's new information

Installing the Model Import Connector for RepSM Plus

The Model Import Connector for RepSM Plus is supported for installation on Windows and Linux platforms. For detailed instructions about installing the connector, see the Micro Focus Configuration Guide for Model Import Connector for RepSM Plus. You can download the installation executable and guide using the link provided in the e-mail sent to you by Micro Focus.

SmartConnector Enhancements

In each SmartConnector release, various security fixes, feature updates, and bug fixes are made to the field mappings for individual SmartConnectors. If you use any of the SmartConnectors listed in the "Closed Issues" section of these release notes, be aware that installing the updated SmartConnector can impact your created content.

Closed Issues

Number	Description
CON-24796	RepSM Plus stopped receiving reputation data. This issue has been fixed.
CON-25036	Even when a proxy was not required, the RepSM Plus MIC was not connecting to the data feed.

Send Documentation Feedback

If you have comments about this document, you can contact the documentation team by email. If an email client is configured on this computer, click the link above and an email window opens with the following information in the subject line:

Feedback on Model Import Connector for RepSM Plus (Release Notes 8.1.0.8395.0)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to Documentation-Feedback@microfocus.com.

We appreciate your feedback!
