# Installing the Actor Model Import Connector for Active Directory

For information about installing the connector, see the Configuration Guide for the Actor Model Import Connector for Microsoft Active Directory. The guide is available at: <https://protect724.hp.com>.

## Known Limitations

The following are known limitations for this connector:

- The connector can send model information to only one ArcSight Manager.
- The LDAP authentication type used between the connector and Active Directory is simple clear-text authentication.
- The connector's JVM might use more than the default 256 MB of memory. If the agent.log file contains an error indicating that the memory is in the yellow zone, increase the JVM memory or contact ArcSight Customer Support for assistance.
