Fortify Code Security Plugin for JetBrains IDE Tools Release Notes

Software Version: 26.3

Software Release Date: July 2026

Document Release Date: July 2026

Fortify Code Security Plugin for JetBrains IDE Tools

The Fortify Code Security Plugin for JetBrains IDE Tools provides an integrated application security workflow inside JetBrains IDE Tools to support early identification and remediation of vulnerabilities. Use the Fortify Code Security Plugin for JetBrains IDE Tools to authenticate, select target applications, run scans, and remediate findings across Fortify on Demand and Application Security Center.

Known issues

- The Remediate panel in contains minor user-interface and usability inconsistencies. These inconsistencies do not prevent users from viewing remediation guidance.
- Some categories available through the **Group By** option might not organize issues as expected. If this occurs, select a different grouping category or view the issues without grouping.

Support

If you have questions or comments about using this product, contact Customer Support. When contacting Customer Support, provide the following product information:

Software Version: 26.3.0

Software Release Date: July 2026
