

# IDOL Admin

Software Version 12.1.0

## Release Notes

Document Release Date: October 2018  
Software Release Date: October 2018

## Legal notices

### Copyright notice

© Copyright 2018 Micro Focus or one of its affiliates.

The only warranties for products and services of Micro Focus and its affiliates and licensors (“Micro Focus”) are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Micro Focus shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

## Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

You can check for more recent versions of a document through the [MySupport portal](#). Many areas of the portal, including the one for documentation, require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in.

Additionally, if you subscribe to the appropriate product support service, you will receive new or updated editions of documentation. Contact your Micro Focus sales representative for details.

## Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

## New in this Release

This section lists the enhancements to IDOL Admin version 12.1.0.

- In the **Monitor > Asynchronous actions** page, you can now stop actions that are in the processing state.
- IDOL Admin now adds the `ActionID` parameter to every ACI action that it sends. It assigns the action ID by using the prefix **idolAdmin** and a UUID, unless the action already has an action ID (for example if the user provides a custom action ID to a request in the console).
- In Community, IDOL Admin now pages and filters the list of users on the server side, so that all users are now displayed and searchable. Previously only the first 1000 users were displayed. The Add User(s) to Role dialog box also now includes searching and paging for users.
- IDOL Admin supports nested roles in IDOL Community.
  - On the **Users** page, IDOL Admin can show the roles that a user is assigned to indirectly (for example, by being assigned to a child role of a role). To show these roles select the new check box **Show roles recursively**.
  - On the **Roles** page, you can view the child roles that belong to a role, and add and remove child roles. To show users and roles that belong to a role only because they are inherited from child roles, select the new check boxes **Show users recursively** and **Show roles recursively**.
- The purge datastore feature for IDOL Connectors can now purge the datastores for all fetch tasks.
- The feature to compact the data index, for IDOL Content, can now perform a backup before compacting the index. There is also an option to compact only the nodetable.

## Resolved Issues

This section lists the resolved issues in IDOL Admin version 12.1.0.

- On the monitoring page, the list of asynchronous action queues was incomplete for some components.
- In the configuration view, long lines went off the edge of the page, and could not scroll. These lines now wrap.
- The Test Action output for the Distributed Action Handler (DAH) did not always show the used engines returned by the DAH.
- With IDOL Community, after adding users to a role, the confirmation message did not display the user names of the users that were added.
- With IDOL Community, after adding a role to a privilege, the confirmation message did not display the name of the role that was added.

# Documentation

The following documentation was updated for this release.

- *IDOL Admin User Guide*
