Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

You can check for more recent versions of a document through the [MySupport portal](#). Many areas of the portal, including the one for documentation, require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in.

Additionally, if you subscribe to the appropriate product support service, you will receive new or updated editions of documentation. Contact your Micro Focus sales representative for details.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release 4

Resolved Issues 5

Documentation 6

New in this Release

This section lists the enhancements to IDOL Content Component version 12.2.0.

- IDOL Content supports a new service action, `IndexerGetStatus`. This is similar to the `IndexerGetStatus` ACI action, but is not blocked when a `DREINITIAL` command is in progress and only returns the most recent item from the index queue.
- The response of the `GetStatusInfo` service action indicates whether a `DREINITIAL` command is in progress.
- Elliptic Curve certificates and keys are supported, to enable the use of ECDSA and ECDH ciphers in TLS communications.

Resolved Issues

This section lists the resolved issues in IDOL Content Component version 12.2.0.

- Query operators containing a distance (for example, `NEAR3`) did not work correctly when the characters 0-9 were configured as `SoftSeparators`.
- When the results of a parametric search were sorted with the `NumberIncreasing` or `NumberDecreasing` options, non-numeric values were returned before numeric values.

Documentation

The following documentation was updated for this release.

- *IDOL Expert*
- *IDOL Getting Started Guide*
- *IDOL Server Reference*
- *IDOL Content Component Reference*
- *IDOL Server Administration Guide*
