Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release 4

Resolved Issues 5

Documentation 6

New in this Release

The following new features were released in IDOL Data Admin version 12.8.0.

- A new Boost Rules page has been added, which allows you to define rules to adjust the search result weightings based on document field values. You can also restrict these rules to specific users, by using a field restriction.

To use Boost Rules, your QMS queries must set `ExplicitProfiling` to **true**, and set `Username`. Find version 12.8 and later has these parameters set by default.

NOTE: This feature requires an `AlwaysMatchType` field in QMS Agentstore. If you upgrade Agentstore to version 12.8 or later, an `AlwaysMatchType` field is configured by default, which matches the 12.8 IDOL Data Admin configuration. Otherwise, you must configure an `AlwaysMatchType` field in QMS Agentstore, and add it to the IDOL Data Admin settings page.

- Security improvements have been made to prevent clickjacking.

Resolved Issues

There were no resolved issues in IDOL Data Admin version 12.8.0.

Documentation

The following documentation was updated for IDOL Data Admin version 12.8.0.

- *IDOL Data Admin Administration Guide*
- *IDOL Data Admin User Guide*

NOTE: The *IDOL Data Admin Installation Guide* has been renamed to the *IDOL Data Admin Administration Guide*.
